

# Dissociation & Dissociative Identity Disorder

Facilitated by **Kath Moore** (Dip Psychodynamic) & **Martin Chester** (Dip Psychodynamic)

17<sup>th</sup> & 24<sup>th</sup> February 2012 (Fridays 10am to 2.30pm)

## Learning Outcomes

This training has been developed to help you untangle the mystery of Dissociation and Dissociative Identity Disorder. For those of you who work with clients who may present with these conditions this training will give you a solid base of knowledge to build upon to support your work.

We aim to explore ways of recognising and working with clients who present with these conditions and we will also look at the hazards and complexities of working with client who present with these characteristics.

**Dissociative identity disorder** is a psychiatric diagnosis and describes a condition in which a person displays multiple distinct identities (known as alters or parts), each with its own pattern of perceiving and interacting with the environment

[http://en.wikipedia.org/wiki/Dissociative\\_identity\\_disorder](http://en.wikipedia.org/wiki/Dissociative_identity_disorder)

**Dissociation** is an altered state of consciousness characterized by partial or complete disruption of the normal integration of a person's normal conscious or psychological functioning. Dissociation is most commonly experienced as a subjective perception of one's consciousness being detached from one's emotions, body and/or immediate surroundings. <http://en.wikipedia.org/wiki/Dissociation>
